

Color & Additive Masterbatches  
Plastic Compounds

# LunaTiv

LunaFam Additives are available in different polymer carriers and are produced for different applications, from preventing oxidation, keeping the the fluid inside a container from UV effects, preventing building up of electro static charge, to overcome the resin's natural tackiness so they can move easily through converting and packaging equipments.

# LunaTiv

## Anti UV:

- Plastic Protector against UV Radiation
- UV Absorber

## Available in PP, PE, and PET:

### Applications:

- Fiber
- Film
- Bottle

## Anti Static:

Available in PP, PE, PET Applications:

### Applications:

- Tape
- Film
- Sheet

## Anti Oxidant:

Available in PP, PE, PET Applications:

### Applications:

- Tape
- Film
- Sheet

## Slip Agent

Available in PE, PET, and HDPE

### Applications:

- Film
- Sheet
- BOTTLE CAP with special advantages:

Reducing cycle time

Energy Saver

More efficiency
