Plastic Compounds

Color for PVC

LunaFam PVC products are available in PType (Powder Type) and GType (Granule Type), each with their great advantages, and can be used in a wide range of applications , from window profiles to pipe fitting.

Color for PVC

General Advantages:

- Excellent Fastness
- Also available in acid resistant grade for acid resistance applications
- High Light Fastness
- High Weathering Fastness

Powder Type Advantages

- Excellent Dispersion Effect of Masterbatch in the PVC polymer chain
- Excellent Color Homogeneity
- Perfect Rheological Effect (especially when used as a toner according to Masterbatch delivery form)
- Works as a Dust-Free color and Free Flowing in comparison with pigments
- Toners also available generally in Blue and Violet Types

APPLICATIONS

Window Profiles
Edge Banding
Injection Molded Parts
Pharmaceutical Packaging
Films (Soft PVC)
Cables and Wires
Plastisol
Pipe Fitting
