

Color & Additive Masterbatches
Plastic Compounds

MonoFam

LunaFam Mono Masterbatches are available in PE and PP polymer carriers and are divided into Organic Pigments (up to 60% concentration) and Inorganic Pigments (up to 80% concentration)

MonoFam

Applications:

- Fiber
- Film
- Injection
- Tape
- Sheet
- Food Packaging

Advantages

- Excellent Filterability
- High Level of Pigment Loading
- Excellent Pigment Dispersion
- Low Filter Pressure Value
- High Concentration
- Color Consistency
- Appropriate Fastness Properties
- More Economical in comparison with taylor-made Masterbatches
- Recipes available upon request
